Programming Session Assignment 02

By TA 林尚謙

1. Required files

You need to summit a .zip file named PSA02_b07901xxx.zip (your student ID) that contains the following files:

    PSA02_p1.cpp

    PSA02_p2.cpp

    PSA02_p3.cpp

Please upload the .zip file to the CEIBA website by the deadline. Do not submit any executable files (.exe). Files with names in wrong format will not be graded. Due date: 10/4 03:00

2. Problem Description

(1) [Input Function][Required File: PSA02_p1.cpp][30pts]

Please write a program that request for three numbers and calculate their average. The program should ask three integers to calculate the average, then ask an integer to assign the precision of output average (輸出至小數點後第幾位).

```
Please enter three numbers:
11
21
39
Please enter the output precision:
2
average = 23.67
```

```
Please enter three numbers:
111
23
176
Please enter the output precision:
4
average = 103.3333
```

(2) [Math Function][Required File: PSA02_p2.cpp][35pts]

Please use the math functions and bitwise operators to find the answers and print them out. Remember to include the header file "cmath".

```
|(sin(1.22) - cos(0.08)| =
tanh(0.8)^0.25 + sinh(0.7)^0.15 =
Decimal value of 0001 0101 0000 0001 =
Decimal value of 0111 1111 1101 1101 =
Decimal value of 0110 1010 1101 1100 =
Decimal value of 1100 0010 0110 1110 =
Decimal value of 1111 0110 0100 0100 =
Decimal value of 0001 0101 1101 0011 =
```

These binary numbers are represented in 16-bit 2's complement

(3) [Conditional Structure][Required File: PSA02_p3.cpp][35pts]

Please refer to the ASCII table and write a program that converts a character's decimal integer value back to the character. Try to check whether the input is printable or not and remind the user.

See the table below as output example:

Input number range	Result to print	Example
0~31, 127	It's a control char.	input:10 It's a control char.
32~126	char(num)	input:67 C
otherwise	Input Error!	input:200 Input Error!

ASCII TABLE

Decimal	Hexadecimal	Binary	Octal	Char	Decimal	Hexadecimal	Binary	Octal	Char	Decimal	Hexadecimal	Binary	Octal	Char
0	0	0	0	[NULL]	48	30	110000	60	0	96	60	1100000	140	`
